

Sculpting with Attitude

Tutored by Lucianne Lassalle

In this focused workshop, we'll create a sculpture with an attitudinal pose. Students should gain a good understanding of the human form by working directly from a life model. We'll start with rough sketching before building on an **armature**. Then there will be an option to move into abstraction or remain focused on realism.

The workshop is suitable for all but experience of life-drawing or observational studies of the human figure, in any material, would be useful. You will be tutored individually and will be encouraged to work at your own pace. If you wish to preserve your finished work, you will need to take it away and have it cast or fired, at your own cost.

Mon 2nd - Thur 5th Dec, 10:00 - 16:30

£435 includes materials, tools, tuition, life model, lunches, refreshments and wonderful views of nature.
