Sculpting With Attitude

Tutored by Lucianne Lassalle

In this focused and creative workshop, we'll create a sculpture with an attitudinal pose. Students should gain a good understanding of the human form by working directly from a life model. Based in a warm, modern studio, we'll start with rough sketching before creating a ¼ life-size sculpture (40cm) **on an armature**.

The workshop is suitable for all but experience of life drawing or observational studies of the human figure, in any material, would be an advantage. You will be tutored individually and will be encouraged to work at your own pace.

You'll work in clay on an armature. If you wish to preserve your finished work, you will need to get it cast in resin or bronze at your own cost. We can advise.
