

Suthering

Evocative and distinctive, folk duo Suthering transport audiences with their exquisite vocal harmonies and their message of hope during hard times. Soaring above piano and delicate, fingerstyle guitar, it's the duo's beautifully matched voices and their fresh approach to folk which make their self-penned songs stand out.

Known for their chemistry and humour on stage, they intertwine messages about the state of our climate, social conscience, and connecting with nature.

"Beautiful harmonies. Two excellent singers." - Genevieve Tudor, BBC Radio
